

◆ PRODUCT OVERVIEW · CONFIDENTIAL

A licensed, self-custodial financial ecosystem for global market access

Compliant, on-chain-settled exposure to the world's assets — built for markets the incumbent rails don't reach.

 Trading Platform

Licensed synthetic exchange

 Digital Identity

Access Standard · KYC/KYB/KYT

 Self-Custodial Wallet

Client-held keys, always

 On-Chain Settlement

Public L2 · tokenisation roadmap

◆ THE TRADING PLATFORM

A licensed, non-custodial synthetic exchange

No shares to source, no client assets to hold — every position faces Fuutura, priced off a reference it cannot touch.

HOW A TRADE IS RISK-MANAGED

No custody, no procurement

Bilateral price contracts, not tokenised shares — nothing to source, nothing held on a client's behalf.

Risk is bounded by design

Every book carries its own hard cap; residual exposure is pre-funded, never socialised across clients.

External, untouchable price

Reference price comes from outside the venue — Fuutura's own quote is never an input.

A growing instrument menu

Indices, single-name equities, FX and commodities — leverage earned tier by tier.

The trust layer, built as native technology

Compliance and custody are not bolted on — they are core Fuutura infrastructure.

Digital Identity

The Fuutura Access Standard

Three-axis engine

Jurisdiction, capability and qualification — each client is classified, not just approved.

Leverage is earned

Entitlements progress on an earned ladder; never granted at entry, never token-gated.

Fuutura Knowledge

A free education-and-simulation academy that doubles as the appropriateness on-ramp.

Own tech + specialist partners

KYC is Fuutura's own technology; KYB, sanctions and on-chain monitoring via best-in-class vendors.

Self-Custodial Wallet

Client keys, client control

Non-custodial by construction

The client wallet holds the balance; the position contract holds only committed collateral.

Program-controlled collateral vault

Rules-based, on-chain — Fuutura cannot move client funds outside the agreed logic.

Gasless, account-abstracted UX

Built for first-time crypto users — no seed-phrase friction, no gas-token juggling.

One wallet, retail and institutional

Same infrastructure serves individual clients and partner/B2B2C access channels.

◆ THE ECOSYSTEM

Built to grow on-chain

A modular stack today, and a two-way bridge for on-chain capital tomorrow.

TODAY

On-chain settlement

Position contracts settle on an established public L2 (Base / Arbitrum / BNB-class).

Stable, transparent

USDT settlement throughout — no operator-issued token stands in for value.

Modular seven-layer stack

Identity, quoting, risk, oracle, settlement and treasury — built to plug in partners.

WHAT'S NEXT — TOKENISATION, TWO WAYS

Inbound

Tokenised global-dollar assets, brought on-chain to underserved markets that today leak to unlicensed offshore venues.

Outbound

On-chain depositary receipts of local champions — routing foreign capital back into the businesses that need it.

The rare crypto model a host government can champion.

IMPORTANT NOTICE — NOT FOR U.S. PERSONS

This document is issued by Fuutura Treasury Inc., a company incorporated in the British Virgin Islands ("Fuutura"). It is provided for information purposes only to a limited number of sophisticated, eligible investors and does not constitute, and should not be construed as, an offer, invitation, solicitation or recommendation to buy or subscribe for any security, token, digital asset or other instrument in any jurisdiction. No offering of \$FTRA or any instrument described herein is being made in, or to any person located or resident in, the United States, or to any U.S. Person (as defined in Regulation S under the U.S. Securities Act of 1933, as amended (the "Securities Act")). Any instruments referenced have not been, and will not be, registered under the Securities Act or the securities laws of any U.S. state, and may not be offered, sold, pledged or otherwise transferred within the United States or to, or for the account or benefit of, a U.S. Person, absent registration or an applicable exemption. Any offering made outside the United States will be made in reliance on Regulation S.

This document is not intended for distribution to, or use by, any person or entity in any jurisdiction where such distribution or use would be contrary to local law or regulation, or would subject Fuutura or its affiliates to any registration or licensing requirement in that jurisdiction. It is the responsibility of any recipient, and of any prospective investor, to inform themselves of and observe all applicable laws and regulations in their own jurisdiction, including any governmental, exchange-control or tax consents required.

Any offer or sale will be made only pursuant to definitive offering documentation (including, where applicable, a Simple Agreement for Future Tokens or equivalent instrument) with eligible, qualified investors in permitted jurisdictions, following completion of applicable KYC, AML, and investor eligibility and suitability procedures. This document does not constitute such documentation and is qualified in its entirety by reference to it.

Nothing in this document constitutes, or should be relied upon as, legal, tax, regulatory, accounting or investment advice. Prospective investors should consult their own professional advisers as to the legal, tax and regulatory consequences of any investment in their own jurisdiction. Statements herein are point-in-time, may reflect internal or third-party estimates, and are subject to change without notice. This document may contain forward-looking statements involving significant assumptions, risks and uncertainties; actual outcomes may differ materially. This document is confidential, intended solely for the named recipient, and may not be reproduced, redistributed or passed on, in whole or in part, to any other person.
